

Health Screening Checklist

This screening should be done by a parent at the beginning of the day before students are sent to school. This checklist applies even to those vaccinated or previously infected.

1. Do you have a fever (38C), do you feel warm, or feel chills?

- Yes
 No

2. Do you have any of the following respiratory symptoms?

- New continuous cough (regularly for over an hour or multiple episodes over 24 hours)
 Sore throat
 Runny nose

3. Loss of sense of taste or smell in the last 24 hours.

- Yes
 No

If they answer yes to questions #1 or #2, please keep them home and inform us. If they answered yes to #3 or have a persistent fever (more than 24 hours) and respiratory difficulties combined with any of the following: general weakness/fatigue; headache; sore throat; nausea/vomiting; diarrhea or confusion, please see a doctor and isolate at home until they are asymptomatic for 4 straight days without the use of any medications or longer as directed by a doctor.

If you, or someone in your household, has had close contact with a COVID-19 patient (spent longer than 15 minutes within 1.5m of someone who was sick with a fever and cough) stay home immediately and self-isolate. If asymptomatic, this is for a period of 10 days from contact. If symptomatic, please see a doctor and isolate at home until they are asymptomatic for 4 straight days without the use of any medications or longer as directed by a doctor. Please inform the school.

If they develop a fever OR any of the respiratory symptoms at school, they will be assessed at school and then sent home to self-isolate until they are asymptomatic for 4 straight days without the use of any medications.
